

THREATQ PROFESSIONAL SERVICES

The ThreatQuotient Professional Services team delivers end-to-end services to transform the capabilities of enterprise security operations. These services empower enterprises to seamlessly deploy the ThreatQ Platform into their environment, bolster their teams' effectiveness through a variety of training and learning experiences, and continuously strengthen the use of threat intelligence in their security operations. The Professional Services team integrates ThreatQ with each enterprise's unique ecosystem of pre-existing technologies in order to extend the architecture of security operations.

Overview

ThreatQuotient provides professional services for our clients at all levels of security operations and threat intelligence maturity. We leverage industry-leading practices and expertise to provide the core capabilities to assess, design, and build your data-driven security operations function. ThreatQuotient has designed the Professional Services Pillars to help clients identify the people, processes, and technologies necessary to effectively integrate intelligence into security operations. These services enable an enterprise to transition from traditional signature-based monitoring, detection, and response to an external threat-focused operations program.

The solutions provided by the ThreatQuotient Professional Services team can be tailored to meet the demands of your organization's security operations.

ThreatQuotient's professional services empower enterprises to seamlessly deploy the ThreatQ Platform into their ecosystem, bolster their teams' effectiveness through hands-on training, and continuously strengthen the use of threat intelligence in their security operations.

PEOPLE - THREATQ ACADEMY

ThreatQ Academy is ThreatQuotient's comprehensive training and learning solutions custom-tailored to meet the evolving needs of our clients and partners in an effort to solidify our commitment to those partnerships.

ThreatQ Academy offers the following courses with various methods of delivery to help resolve logistical obstacles and to support virtually any operational constraints:

THREATQ SECURITY & INTELLIGENCE OPERATIONS TRAINING

ThreatQ Security & Intelligence Operations Training consists of an overview of the cyber threat intelligence lifecycle, ThreatQ design, threat fusion analysis for security operations, and hands-on walkthroughs of the ThreatQ Platform.

THREATQ PLATFORM ADMINISTRATION TRAINING

The ThreatQ Administration training is designed to train clients with the expertise and tools necessary to successfully manage the various components of the ThreatQ platform. This comprehensive training package includes essential topics such as platform architecture and design, installation methods, job management, backup and restore procedures, and access and user management.

THREATQ INTEGRATIONS DEVELOPMENT TRAINING

The ThreatQ Marketplace provides clients with many out-of-the-box integrations with security infrastructure and intelligence feeds. Additionally, ThreatQ provides partners and clients with free access to an API and SDK to create an unlimited number of their own custom integrations between ThreatQ and third-party systems and feeds. ThreatQ Integrations Development training is a hands-on course that covers the various frameworks available in ThreatQ to empower partners and clients to develop integrations using our API and SDK.

THREATQ ACADEMY ONLINE

ThreatQ Academy Online is ThreatQuotient's online learning portal and complements other ThreatQ Academy offerings that include virtual instructor-led and onsite instructor-led training to support virtually any operational need. ThreatQ Academy closes the gap between deployment and training to ensure immediate return on investment for clients by allowing clients access to the most up-to-date information related to ThreatQ features, modules, and capabilities as soon as they are published in ThreatQ Academy.

CYBER THREAT INTELLIGENCE FOUNDATIONS

Cyber Threat Intelligence Foundations will provide clients just starting to consume cyber threat intelligence with an introduction to the various concepts, models, and processes designed to help clients convert their threat data into cyber threat intelligence. Students will gain insight into the different types of intelligence, the stages of the intelligence lifecycle, and examples of reporting on threat intelligence at various levels.

PROCESS - CONSULTING SERVICES

SECURITY OPERATIONS ESSENTIALS

ThreatQuotient believes in establishing partnerships with our clients and each client has unique environments and processes. Our Professional Services Team will work closely with clients to assess their unique cyber threat intelligence and security operations processes related to scoring and expiration of data, information, and intelligence within their ThreatQ Platform, and help them to design and implement custom scoring and expiration policies, as well as, create up to two (2) custom dashboards within ThreatQ.

SECURITY OPERATIONS WORKFLOW DEVELOPMENT

ThreatQuotient will introduce ThreatQ TDR Orchestrator, assist clients in assessing manual workflows, and help to design custom TDR Orchestrator workflows and actions. ThreatQuotient's consultants will work with developers to create up to two (2) custom TDR Orchestrator workflows and up to two (2) actions per workflow on behalf of our clients.

TECHNOLOGY - INTEGRATIONS & IMPLEMENTATIONS

PLATFORM INSTALLATION AND CONFIGURATION

ThreatQuotient provides installation and configuration services to assist a client in getting their ThreatQ Platform up and running in their environment. ThreatQuotient personnel will assist clients with the installation of the ThreatQ Platform and the ThreatQ Marketplace integrations needed to make the platform operational.

INTEGRATION DEVELOPMENT

ThreatQuotient provides development services to prioritize general integration development or to create custom integrations on behalf of clients between the ThreatQ Platform and other security tools and systems used in the client environment. The development services leverage ThreatQ APIs to integrate with external APIs and/or available services.

TDR ORCHESTRATOR WORKFLOW AND ACTION DEVELOPMENT

Clients who purchase ThreatQuotient's Security Operations Workflow Development service will benefit from utilizing our subject matter experts to develop solutions to automate repeatable actions within the platform. Our developers will work hand-in-hand with our consultants to design and develop custom ThreatQ TDR Orchestrator workflows and actions that accelerate enrichment and the ingestion of contextual information needed by threat analysts.

For more information regarding ThreatQuotient's professional services, contact sales@threatquotient.com

ThreatQuotient improves security operations by fusing together disparate data sources, tools and teams to accelerate threat detection and response. ThreatQuotient's data-driven security operations platform helps teams prioritize, automate and collaborate on security incidents; enables more focused decision making; and maximizes limited resources by integrating existing processes and technologies into a unified workspace. The result is reduced noise, clear priority threats, and the ability to automate processes with high fidelity data. ThreatQuotient's industry leading data management, orchestration and automation capabilities support multiple use cases including incident response, threat hunting, spear phishing, alert triage and vulnerability prioritization, and can also serve as a threat intelligence platform. ThreatQuotient is headquartered in Northern Virginia with international operations based out of Europe, MENA and APAC. For more information, visit www.threatquotient.com.
