

STOP BREACHES AND GAIN THREAT KNOWLEDGE

Create an efficient and effective threat operations and management solution leveraging best-in-breed threat intelligence and an extensible threat intelligence platform.

The threat landscape evolves constantly. Identify and understand adversaries and indicators with an advanced, scalable joint solution that enables customers to increase protection of their networks and endpoints.

AN INTEGRATED SOLUTION FROM CROWDSTRIKE AND THREATQUOTIENT

Falcon Intelligence provides actionable insights into the top threat actors, attack vectors and threat intelligence trends.

ThreatQ integrates seamlessly with Falcon Intelligence and automatically ingests all observables into your security infrastructure.

Falcon Host ingests third-party Indicators of Compromise (IOC) from ThreatQ to add an additional layer of protection to your endpoints.

UNDERSTAND AND PRIORITIZE ADVERSARIES

CHALLENGE

Large enterprises need to navigate the explosion of threat data and noise to better understand which attacks are relevant to their environment, quickly detect attack behavior and better defend their network.

SOLUTION

ThreatQ incorporates high-fidelity threat intelligence from CrowdStrike's world-class intelligence team, including information on threat actors

IMMEDIATE TIME-TO-VALUE

- Empower defenders with greater context, control and collaboration
- Ensure threat intelligence is accurate, relevant and timely for your organization
- Deliver efficient and effective threat operations and management, allowing companies to get more from existing resources

JOINT VALUE

- Retro-fit existing security tools with premium threat data from CrowdStrike, including multiple log management, SIEM, network and legacy endpoint detection tools, to further extend the value of existing security controls
- Automatically send third-party Indicators of Compromise (IOC) from ThreatQ to CrowdStrike Falcon Host to secure endpoints in real time
- Integrate CrowdStrike Threat Intelligence into ThreatQ to provide security teams with a single threat library for all intelligence, both external and internal

PARTNER SOLUTION OVERVIEW

and attributions, to build adversary profiles to jump-start hunting and remediation initiatives.

CUSTOMER BENEFIT

By tagging campaign attribution to an event, security teams can deconstruct an adversary's logic over several attack progressions and build a threat profile to determine which defensive strategies will provide the most effective and successful blocking or detection rate.

OPERATIONALIZE THREAT INTELLIGENCE TO STOP ATTACKS

CHALLENGE

With an ever-evolving threat landscape, security teams often lack a clear understanding of how to operationalize threat intelligence and proactively secure their endpoints.

SOLUTION

By utilizing the power and depth of ThreatQ and CrowdStrike's world-class intelligence teams, you can centralize and enrich your threat data feeds, profile adversaries and associated indicators, and leverage Falcon Host to provide immediate and effective prevention.

CUSTOMER BENEFIT

The ability to provide your security team deeper visibility into your adversaries enables you to prevent and detect against all types of attacks – both malware and malware-free.

CONTINUOUS BREACH PREVENTION FROM CROWDSTRIKE

STOP BREACHES

Prevent both malware and malware-free attacks

5-SECOND VISIBILITY

Discover and investigate current and historic endpoint activity

CLOUD-POWERED

Lower cost and effective performance with cloud delivery 24/7

ABOUT THREATQUOTIENT

ThreatQuotient™ understands that the foundation of intelligence-driven security is people. The company's open and extensible threat intelligence platform, ThreatQ, empowers defenders to ensure the right threat intelligence is utilized within the right tools, at the right time. Leading global companies are using ThreatQ as the cornerstone of their threat intelligence operations and management system, increasing security effectiveness and efficiency.

ABOUT CROWDSTRIKE

CrowdStrike is a global cybersecurity leader that has redefined modern security with the world's most advanced cloud-native platform for protecting critical areas of enterprise risk – endpoints and cloud workloads, identity, and data.

Powered by the CrowdStrike Security Cloud, the CrowdStrike Falcon® platform leverages real-time indicators of attack, threat intelligence, evolving adversary tradecraft and enriched telemetry from across the enterprise to deliver hyper-accurate detections, automated protection and remediation, elite threat hunting and prioritized observability of vulnerabilities.

Purpose-built in the cloud, the Falcon platform enables partners to rapidly build best-in-class integrations to deliver customer-focused solutions that provide scalable deployment, superior protection and performance, reduced complexity and immediate time-to-value.
