

THREATQ™ AND POLARITY

Technology Segment: Enrichment & Analysis

With the combination of Polarity and the ThreatQ threat intelligence platform, enables SOC analysts to have immediate data awareness and recall, allowing them to make informed decisions and take action with precision and speed.

THREATQ BY THREATQUOTIENT™

ThreatQuotient's solutions make security operations more efficient and effective. The ThreatQ open and extensible platform integrates disparate security technologies into a single security infrastructure, automating actions and workflows so that tools and people can work in unison. Empowered with continuous prioritization based on their organization's unique risk profile, security teams can focus resources on the most relevant threats, and collaboratively investigate and respond with the aim of taking the right actions faster.

POLARITY PRODUCT OVERVIEW

Data tells a story, Polarity helps you see it with Augmented Reality overlaying contextual information as you work for superhuman Data Awareness and Recall. No glasses, no goggles, Polarity is software giving you the right data at the right time to make informed decisions and take action with speed.

Polarity's computer vision enables you to overlay context relevant to your data in real-time:

- Computer vision recognizes pixels changing on-screen.
- Real-time computer vision automatically reads text on-screen
- Highlight Mode displays context relevant to the text on your screen
- Overlay on top of any application, including all the tools you already use in your organization, even the custom ones

INTEGRATION HIGHLIGHTS

Get immediate data awareness on any indicators that are in your ThreatQ platform, giving you the right data at the right time to make decisions and take action with precision and speed.

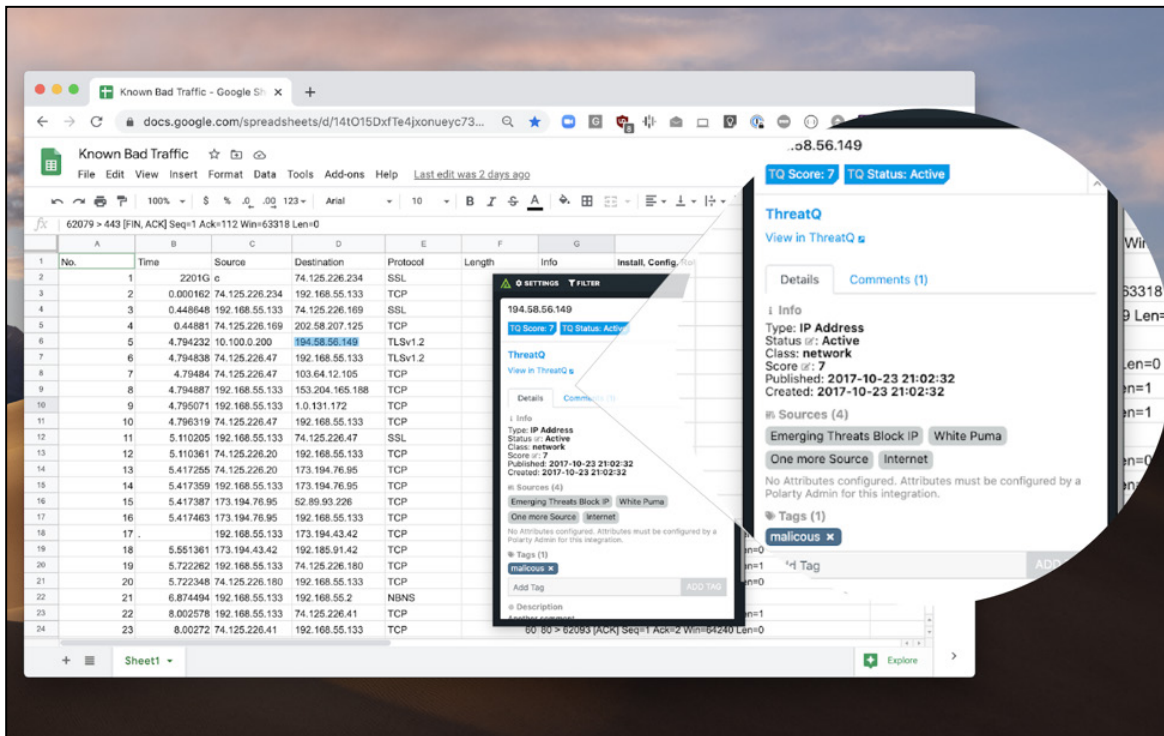

Instantly have data recall from ThreatQ allowing you to see more information on an indicator and take the correct actions.

Interact with information in ThreatQ by adding attributes or comments, enabling other team members to have the data awareness needed within ThreatQuotient.

INTEGRATION USE CASES:

The Integration supports a variety of use cases such as:

- Security Operations - The Polarity-ThreatQ integration enables SOC analysts to have immediate data awareness and recall from ThreatQuotient, allowing them to make informed decisions and take action with precision and speed.
- IR/Threat hunting - The Polarity-ThreatQ integration enables Incident Responders and Threat Hunters to have immediate data awareness and recall on ThreatQuotient’s data during any investigation.

ABOUT THREATQUOTIENT™

ThreatQuotient’s mission is to improve the efficiency and effectiveness of security operations through a threat-centric platform. By integrating an organization’s existing processes and technologies into a single security architecture, ThreatQuotient accelerates and simplifies investigations and collaboration within and across teams and tools. Through automation, prioritization and visualization, ThreatQuotient’s solutions reduce noise and highlight top priority threats to provide greater focus and decision support for limited resources. ThreatQuotient is headquartered in Northern Virginia with international operations based out of Europe and APAC.
