

SOLUTION BRIEF

Intelligence-Based Enhancement of Security Operations Programs

A collaboration between ThreatQ and Mandiant Threat Intelligence

INTEGRATION HIGHLIGHTS

- Makes threat intelligence contextual, tailored and actionable to your security mission.
- Offers visibility beyond the typical attack lifecycle, adding context and priority to global threats with MITRE ATT&CK.
- Improves ability to prioritize and remediate security alerts, and patch security vulnerabilities
- Delivers granular reports to help align security programs and resources against your most likely threats and actors
- Provides user-configurable Intelligence to eliminate noise at the integration level.

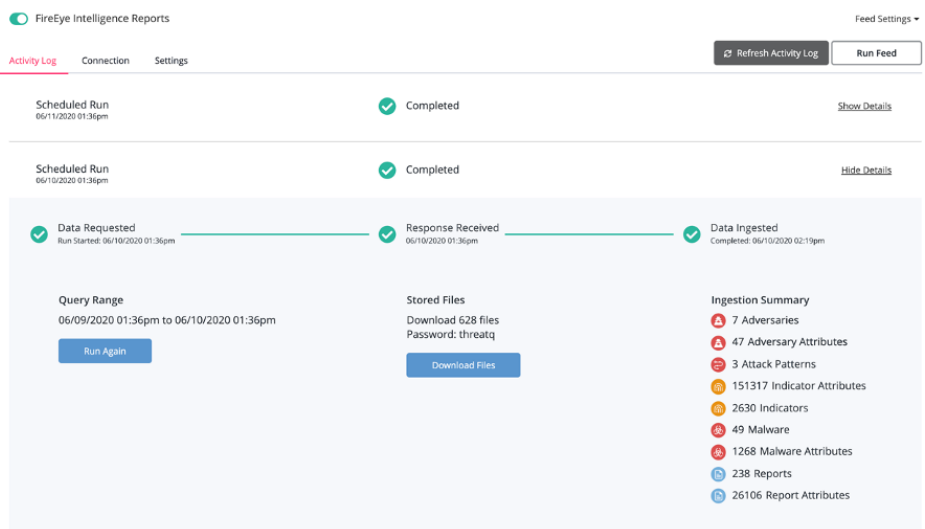

With the combination of Mandiant Threat Intelligence and the ThreatQ platform, organizations can make threat intelligence actionable to improve the efficiency and effectiveness of security operations programs.

ThreatQ by ThreatQuotient

ThreatQuotient's solutions make security operations more efficient and effective. The ThreatQ open and extensible platform integrates disparate security technologies into a single security infrastructure, automating actions and workflows so that tools and people can work in unison. Empowered with continuous prioritization based on their organization's unique risk profile, security teams can focus resources on the most relevant threats, and collaboratively investigate and respond with the aim of taking the right actions faster.

Mandiant Threat Intelligence

Cyber attackers are often better trained, better funded and better staffed than many security organizations. So security organizations must look for ways to increase their own security expertise and effectiveness. They need to improve their response capabilities and ensure their defenses are aligned against the most likely threats—without breaking the bank. Cost-effective Mandiant Threat Intelligence Subscriptions meet these challenges by providing a wide range of actionable threat data and finished intelligence to meet the tactical and strategic intelligence needs of organizations of all sizes, shapes and industries.

The screenshot displays the ThreatQ interface for FireEye Intelligence Reports. It shows a 'Scheduled Run' on 06/11/2020 at 01:36pm, which is 'Completed'. Below this, another 'Scheduled Run' on 06/10/2020 at 01:36pm is also 'Completed'. A detailed view of the run shows a 'Data Requested' step (Run Started: 06/10/2020 01:36pm), a 'Response Received' step (06/10/2020 01:36pm), and a 'Data Ingested' step (Completed: 06/10/2020 02:19pm). The 'Query Range' is 06/09/2020 01:36pm to 06/10/2020 01:36pm. The 'Stored Files' section indicates 628 files were downloaded with the password 'threatq'. The 'Ingestion Summary' lists: 7 Adversaries, 47 Adversary Attributes, 3 Attack Patterns, 151317 Indicator Attributes, 2630 Indicators, 49 Malware, 1268 Malware Attributes, 238 Reports, and 26106 Report Attributes.

Table 1. Integration use cases.

Use Cases	Objective
Incident Validation and Prioritization	Determine which incidents are likely to pose a risk to the enterprise and prioritize those with the highest potential for negative impact on the business
Incident Analysis	<ul style="list-style-type: none"> • Answer questions about the who, what, why, when and how of attacks. • Determine if attacks are still in progress and identify their effects
Containment and Remediation	<ul style="list-style-type: none"> • Disrupt attacker communications • Remove malware and reverse changes • Eliminate vulnerabilities
Hunt Missions	Uncover previously undiscovered attacks related to current incidents or to threats targeting the enterprise’s industry, geographical locations, applications, etc.

About ThreatQuotient

ThreatQuotient’s mission is to improve the efficiency and effectiveness of security operations through a threat-centric platform. By integrating an organization’s existing processes and technologies into a single security architecture, ThreatQuotient accelerates and simplifies investigations and collaboration within and across

teams and tools. Through automation, prioritization and visualization, ThreatQuotient’s solutions reduce noise and highlight top priority threats to provide greater focus and decision support for limited resources. ThreatQuotient is headquartered in Northern Virginia with international operations based out of Europe , APAC and MENA. For more information, visit www.threatquotient.com.
