With the combination of Cisco Umbrella and the ThreatQ Threat Intelligence Platform, organizations can uncover current and emerging threats and stop phishing, malware and ransomware earlier.

**THREATQ BY THREATQUOTIENT™**

ThreatQ is an open and extensible threat intelligence platform (TIP) to provide defenders the context, customization and collaboration needed for increased security effectiveness and efficient threat operations and management. ThreatQ accelerates the transformation of threat data into actionable threat intelligence by giving defenders unmatched control through a Threat Library™, an Adaptive Workbench™ and an Open Exchange™ to ensure that intelligence is accurate, relevant and timely to their business. With ThreatQ, customers can automate much of what is manual today and get more out of existing security resources, both people and infrastructure.

**CISCO UMBRELLA**

As the industry’s leading Secure Internet Gateway, Cisco Umbrella provides the first line of defense against threats on the Internet wherever users go. Leveraging their global infrastructure, which resolves over 120 billion Internet requests a day, Umbrella is able to see where imminent attacks are being staged. It also delivers complete visibility into Internet activity across all locations, devices and users, and blocks threats before they ever reach your network or endpoints. Additionally, Umbrella is an open platform and integrates easily with your existing security stack and delivers live threat intelligence about current and emerging threats. By analyzing and learning from Internet activity patterns, Umbrella automatically uncovers attacker infrastructure staged for attacks, and proactively blocks requests to malicious destinations before a connection is even established — without adding any latency for users.

With Umbrella, you can stop phishing and malware infections earlier, identify already infected devices faster and prevent data exfiltration.
ABOUT THREATQUOTIENT™

ThreatQuotient understands that the foundation of intelligence-driven security is people. The company’s open and extensible threat intelligence platform, ThreatQ™, empowers defenders to ensure the right threat intelligence is utilized within the right tools, at the right time. Leading global companies are using ThreatQ as the cornerstone of their threat intelligence operations and management system, increasing security effectiveness and efficiency.
