

THREATQ™ AND RISKIQ

The combination of ThreatQ and RiskIQ delivers intelligently aggregated threat intelligence to protect organizations from modern cybersecurity threats.

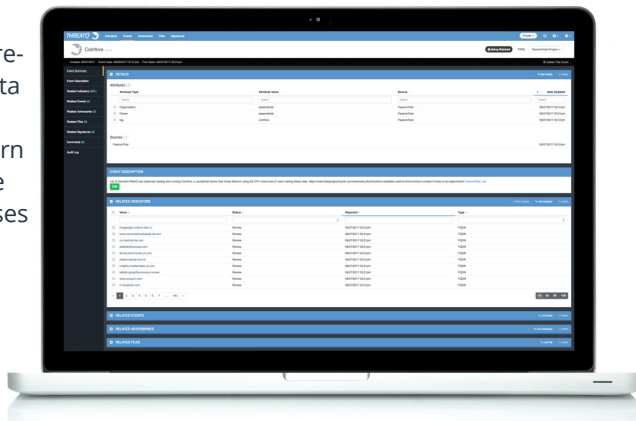

Using RiskIQ's PassiveTotal® expedites investigations by connecting internal activity, event and incident indicator of compromise (IOC) artifacts to what is happening outside the firewall — external threats, attackers and their related infrastructure. PassiveTotal simplifies the event investigation process by providing analysts access to a consolidated platform of data necessary to accurately understand, triage and address security events.

THREATQ BY THREATQUOTIENT™

ThreatQ is an open and extensible threat intelligence platform (TIP) to provide defenders the context, customization and collaboration needed for increased security effectiveness and efficient threat operations and management. ThreatQ accelerates the transformation of threat data into actionable threat intelligence by giving defenders unmatched control through a Threat Library™, an Adaptive Workbench™ and an Open Exchange™ to ensure that intelligence is accurate, relevant and timely to their business. With ThreatQ, customers can automate much of what is manual today and get more out of existing security resources, both people and infrastructure.

RISKIQ PASSIVETOTAL

PassiveTotal provides access to the most comprehensive, Internet-wide data sets available to protect organizations from modern cybersecurity threats. The platform maps and exposes threat infrastructure and provides unparalleled external context and intelligence to internal events and incidents.

INTEGRATION HIGHLIGHTS

Simplify and accelerate investigative and incident response processes

Intelligently aggregate and correlate data to provide context

Proactively track and alert on changes to threat infrastructure

Identify and proactively block threat infrastructure being used by attackers

Correlate WHOIS and passive DNS data with other indicators

ADVANTAGES

UNRIVALED INTELLIGENCE	FORCE MULTIPLIER	WORK SMARTER	CONTEXT MATTERS
Tap into the deepest, broadest data sets available for threat investigation and harness the power of RiskIQ's award-winning research, data science and automation.	Give junior analysts access to a platform that allows them to operate more effectively by automatically correlating data across multiple data sets.	Enable collaboration between security analysts and incident response teams to enrich investigations and reduce time to response with TeamStream and project capabilities.	Enrich investigations and quickly pivot between multiple data sets in a single platform, allowing connections to be made between disparate information and data sources.

INTEGRATION USE CASES

Use PassiveTotal passive DNS data to query for a domain or IP addresses' historical record

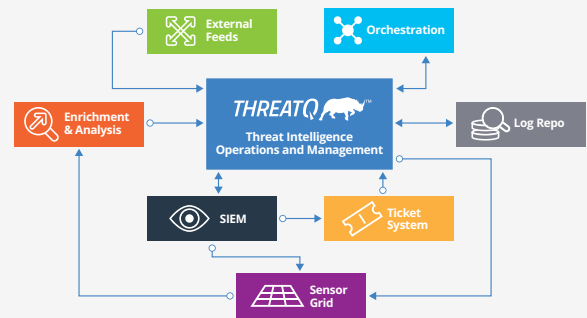

Enrich domains and IP addresses with tags, malicious disposition and other metadata from PassiveTotal

Sync indicators and tags between the ThreatQ platform and PassiveTotal Projects to facilitate pivoting during an investigation from within ThreatQ

Search WHOIS data by Email Address to return all domains registered to that Email Address

OPEN EXCHANGE ARCHITECTURE

ThreatQ's Open Exchange provides an extensible and flexible environment for analysts to achieve the optimal balance between system automation and expert analysis. Because no single security solution provides a silver bullet against attacks, ThreatQ's Open Exchange architecture supports standard interfaces for ingestion and exporting, including STIX/TAXII, XML, JSON, PDF, email and other formats of structured and unstructured data, along with an SDK and APIs for custom connections.

ABOUT THREATQUOTIENT™

ThreatQuotient understands that the foundation of intelligence-driven security is people. The company's open and extensible threat intelligence platform, ThreatQ™, empowers defenders to ensure the right threat intelligence is utilized within the right tools, at the right time. Leading global companies are using ThreatQ as the cornerstone of their threat intelligence operations and management system, increasing security effectiveness and efficiency.

ABOUT RISKIQ

RiskIQ is the leader in digital threat management, providing the most comprehensive discovery, intelligence and mitigation of threats associated with an organization's digital presence. With more than 75 percent of attacks originating outside the firewall, RiskIQ allows enterprises to gain unified insight and control over web, social and mobile exposures. Trusted by thousands of security analysts, RiskIQ's platform combines advanced Internet data reconnaissance and analytics to expedite investigations, understand digital attack surfaces, assess risk and take action to protect business, brand and customers.
