THREATQ™ AND RISKIQ

The combination of ThreatQ and RiskIQ delivers intelligently aggregated threat intelligence to protect organizations from modern cybersecurity threats.

Using RiskIQ's PassiveTotal® expedites investigations by connecting internal activity, event and incident indicator of compromise (IOC) artifacts to what is happening outside the firewall — external threats, attackers and their related infrastructure. PassiveTotal simplifies the event investigation process by providing analysts access to a consolidated platform of data necessary to accurately understand, triage and address security events.

THREATQ BY THREATQUOTIENT™

ThreatQ is an open and extensible threat intelligence platform (TIP) to provide defenders the context, customization and collaboration needed for increased security effectiveness and efficient threat operations and management. ThreatQ accelerates the transformation of threat data into actionable threat intelligence by giving defenders unmatched control through a Threat Library™, an Adaptive Workbench™ and an Open Exchange™ to ensure that intelligence is accurate, relevant and timely to their business. With ThreatQ, customers can automate much of what is manual today and get more out of existing security resources, both people and infrastructure.

RISKIQ PASSIVETOTAL

PassiveTotal provides access to the most comprehensive, Internet-wide data sets available to protect organizations from modern cybersecurity threats. The platform maps and exposes threat infrastructure and provides unparalleled external context and intelligence to internal events and incidents.

INTEGRATION HIGHLIGHTS

- Simplify and accelerate investigative and incident response processes
- Intelligently aggregate and correlate data to provide context
- Proactively track and alert on changes to threat infrastructure
- Identify and proactively block threat infrastructure being used by attackers
- Correlate WHOIS and passive DNS data with other indicators
ABOUT THREATQUOTIENT™

ThreatQuotient understands that the foundation of intelligence-driven security is people. The company’s open and extensible threat intelligence platform, ThreatQ™, empowers defenders to ensure the right threat intelligence is utilized within the right tools, at the right time. Leading global companies are using ThreatQ as the cornerstone of their threat intelligence operations and management system, increasing security effectiveness and efficiency.

ABOUT RISKIQ

RiskIQ is the leader in digital threat management, providing the most comprehensive discovery, intelligence and mitigation of threats associated with an organization’s digital presence. With more than 75 percent of attacks originating outside the firewall, RiskIQ allows enterprises to gain unified insight and control over web, social and mobile exposures. Trusted by thousands of security analysts, RiskIQ’s platform combines advanced Internet data reconnaissance and analytics to expedite investigations, understand digital attack surfaces, assess risk and take action to protect business, brand and customers.
