

# THREATQ™ AND FARSIGHT SECURITY

Farsight Security provides rapid threat detection and response to identify and react to incursions of your internet presence and brand.

The joint solution of ThreatQ™ and Farsight Security allows organizations to quickly enrich threat data and assist in proactive hunting, enabling them to work smarter and more efficiently to detect, react and stop attacks before they have a chance to start.

## THREATQ BY THREATQUOTIENT™

ThreatQ is an open and extensible threat intelligence platform (TIP) to provide defenders the context, customization and collaboration needed for increased security effectiveness and efficient threat operations and management. ThreatQ accelerates the transformation of threat data into actionable threat intelligence by giving defenders unmatched control through the Threat Library™, Adaptive Workbench™ and Open Exchange™ to ensure that intelligence is accurate, relevant and timely to their business. With ThreatQ, customers can automate much of what is manual today and get more out of existing security resources, both people and infrastructure.

## FARSIGHT

Farsight Security DNSDB™ is the world's largest DNS intelligence database that provides a unique, fact-based, multifaceted view of the configuration of the global Internet infrastructure. DNSDB leverages the richness of Farsight's Security Information Exchange (SIE) data-sharing platform and is engineered and operated by leading DNS experts. Farsight collects Passive DNS data from its global sensor array. It then filters and verifies the DNS transactions before inserting them into the DNSDB, along with ICANN-sponsored zone file access download data. The end result is the highest-quality and most comprehensive DNS intelligence service of its kind — with more than 100 billion domain resolution records and updated in real-time at over 200,000 times/second.

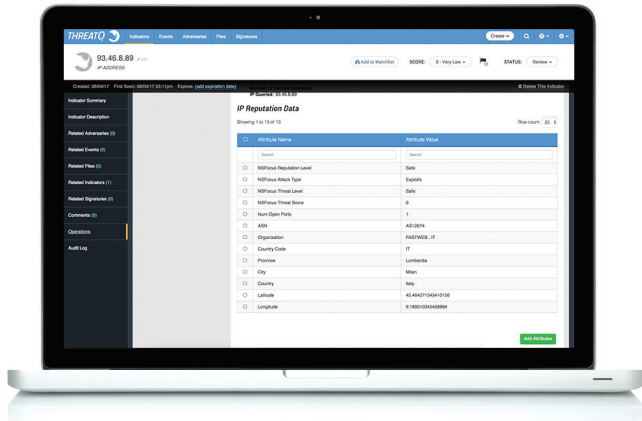

### INTEGRATION HIGHLIGHTS

Accelerate incident response and expose the entire miscreant network by pivoting between Domains and IPs

Find intelligence, enriched events, data and history in one place to enable focus on hunting

Enable security, network and infrastructure teams to respond quicker using clear, correlated and contextualized threat intelligence data.

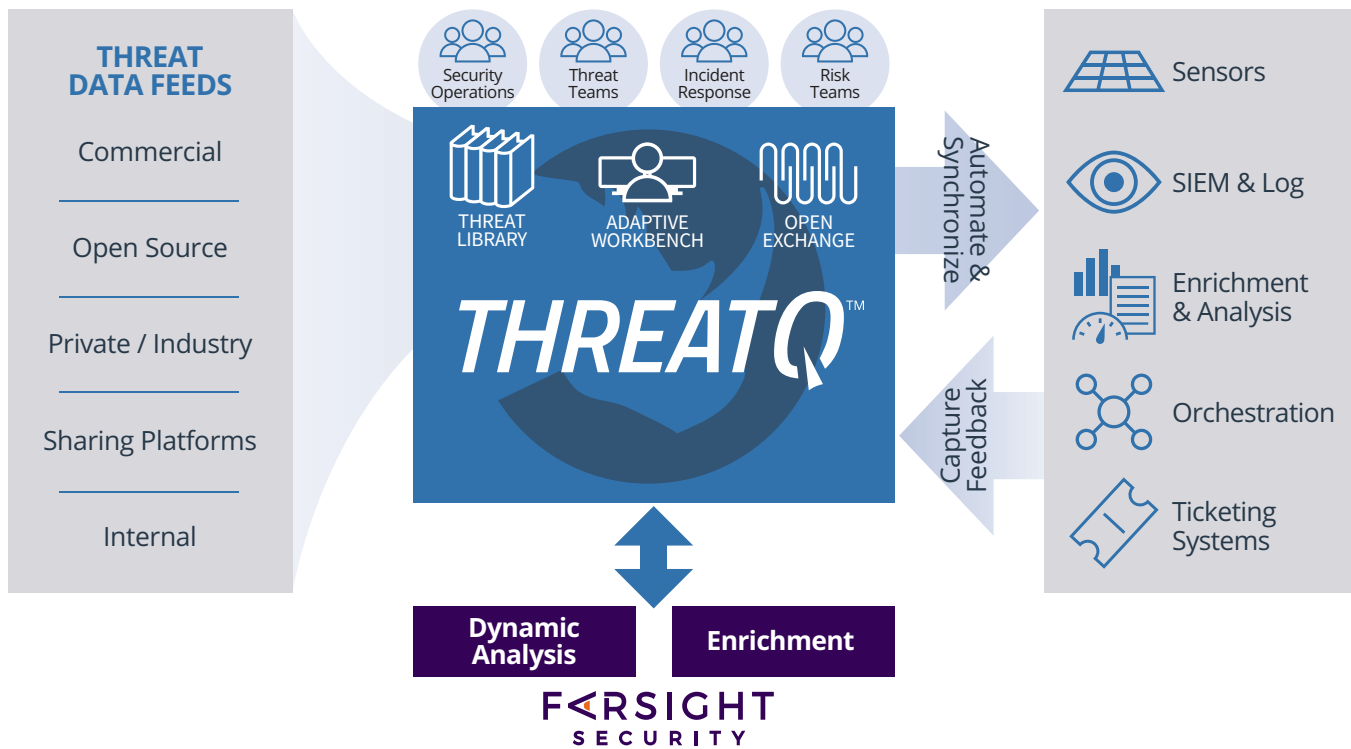

# PARTNER SOLUTION OVERVIEW

## INTEGRATION USE CASES

The Integration supports a variety of use cases, such as:

- Expose entire adversarial infrastructure by enriching IOC domains and IPs to proactively hunt threats.
- Triage events and incidents with more confidence and actions to remediate.
- Examine historical resolution lookups and perform time-based analysis.
- Utilize the ability to deploy near real-time defensive actions to threats.

## ABOUT THREATQUOTIENT™

ThreatQuotient™ understands that the foundation of intelligence-driven security is people. The company's open and extensible threat intelligence platform, ThreatQ™, and cybersecurity situation room solution, ThreatQ Investigations, empower security teams with the context, customization and prioritization needed to make better decisions, accelerate detection and response, and advance team collaboration. Leading global companies use ThreatQuotient solutions as the cornerstone of their security operations and threat management system.

## ABOUT FARSIGHT SECURITY

Farsight Security is the world's largest provider of historical and real-time passive DNS data. We enable security teams to qualify, enrich and correlate all sources of threat data and ultimately save time when it is most critical - during an attack or investigation. Our solutions provide enterprise, government and security industry personnel and platforms with unmatched global visibility, context and response. Farsight Security is headquartered in San Mateo, California, USA.
