Advances in networking and communications are improving the way you do business. Information is moving faster than your business. And cyber criminals are creating new threats faster than you can respond. A different approach is needed to protect your assets – Intelligence-driven Security.

**THREATQ™ BY THREATQUOTIENT™**

ThreatQ is an open and extensible threat intelligence platform (TIP) that provides defenders the context, customization and collaboration needed for increased security effectiveness and efficient threat operations and management. ThreatQ accelerates the transformation of threat data into actionable threat intelligence by giving defenders unmatched control through a Threat Library™, an Adaptive Workbench™ and an Open Exchange™ to ensure that intelligence is accurate, relevant and timely to their business. With ThreatQ, customers can automate much of what is manual today and get more out of existing security resources, both people and infrastructure.

**SYMANTEC DEEPSIGHT™ INTELLIGENCE OVERVIEW**

Symantec DeepSight™ Intelligence provides both Adversary Intelligence and Technical Intelligence. The intelligence is drawn from Symantec's broad portfolio of security products, as well as its adversary intelligence operations, which include security research and analysis teams positioned across the globe. DeepSight Intelligence data is enriched, verified and analyzed to provide attribution and to connect seemingly disparate indicators into campaigns with known actors and motivations behind them.

DeepSight Adversary Intelligence includes intelligence on actors, campaigns, and their tactics, techniques and procedures (TTPs).

**INTEGRATION HIGHLIGHTS**

Provide security teams with a single threat library for all threat intelligence, both external and internal

Ensure threat intelligence is accurate, relevant and timely for your organization

Automate distribution of indicators to prevention-based controls

Proactively move from an understanding of adversaries to defenses against their indicators

By tagging campaign attribution to an event, security teams can deconstruct an adversary’s logic over several attack progressions and build a threat profile to determine which defensive strategies will provide the most effective and successful blocking or detection rate.
ABOUT THREATQUOTIENT™

ThreatQuotient understands that the foundation of intelligence-driven security is people. The company’s open and extensible threat intelligence platform, ThreatQ™, empowers defenders to ensure the right threat intelligence is utilized within the right tools, at the right time. Leading global companies are using ThreatQ as the cornerstone of their threat intelligence operations and management system, increasing security effectiveness and efficiency.

ABOUT SYMANTEC AND DEEPSIGHT INTELLIGENCE

Symantec Corporation (NASDAQ: SYMC) is the global leader in cybersecurity. Operating one of the world’s largest cyber intelligence networks, we see more threats, and protect more customers from the next generation of attacks. We help companies, governments and individuals secure their most important data wherever it lives.

Symantec’s DeepSight Intelligence arms security teams with actionable insights that provide a deeper understanding of the threat landscape so companies can better anticipate and mitigate cybersecurity risk.
